

FOR IMMEDIATE RELEASE

Bryston and StormAudio Announce Collaboration

Bryston to unveil SP4 surround processor based on acclaimed StormAudio platform StormAudio to introduce 2-channel and 4-channel amplifiers based on legendary Bryston Cubed Series Technology

Peterborough, Ontario February 1st, 2018 – Bryston has announced that they will be working in collaboration with StormAudio, a premium audio hardware manufacturer based in France, enabling both companies to leverage their respective design and manufacturing expertise in an array of new product offerings. As a byproduct of the cooperative effort, Bryston will be unveiling an SP4 surround processor and StormAudio will be leveraging Bryston's award-winning Cubed Series amplifier technology. Bryston has demonstrated past success partnering with respected A/V brands such as Harman, PMC, Axiom and others.

Bryston SP4

The SP4 will be a 16.2-channel processor with an option to add four channels to achieve 20-channel mode. The SP4 will support all popular immersive surround formats, such as Dolby Atmos[®], Auro-3D[®] and DTS:X[™] as well as conventional formats. The SP4 will also feature Dirac[®] Live room correction, giving home theater dealers and enthusiasts access to the latest technologies within a Bryston home theater. Most critically, the SP4 will be built on a 3U modular platform, enabling Bryston engineers to integrate advanced technologies and make upgrades available to consumers, extending the life of the product. The SP4 will also be compatible with popular control system platforms, including Savant, RTI, Control4 and Crestron. The Bryston SP4 is expected to become available Q2, 2018.

StormAudio Amplifiers

StormAudio will introduce 2-channel and 4-channel amplifiers based on the Bryston Cubed Series technology, giving StormAudio a premium solution with unmatched performance and reliability.

About Bryston: Bryston (bryston.com) first opened for business in 1962 as a manufacturer of medical equipment. The company was purchased in 1968 by John W. Russell, an ex-NASA engineer. Together with sons Chris, Brian and John D., they first started exploring the field of accurate, reliable audio amplification in the early 1970s. Since that time Bryston has become legendary for their hand-built quality, superb performance and dependability under load in the home, professional and commercial markets. Bryston amplifiers are used in some of the world's most renowned recording studios and owned by many discerning music professionals. Bryston applies precision manufacturing techniques and materials in the assembly of their electronic equipment that are more typically utilized by the military and aerospace industries. Bryston is based in Peterborough, Ontario Canada, northeast of Toronto, and is sold through over 150 dealers in North America and 60 countries worldwide.

About StormAudio: StormAudio delivers superior audio electronics that support all existing and future leading sound formats, such as Auro-3D[®], Dolby Atmos[®] and DTS:X[™]. Designed for the most demanding customers, the products offer "best-in-class" performance, versatility, extreme reliability and the most advanced market features. The brand's products are available through a specialized distributor network worldwide, with a focus on customer services and technical support. The StormAudio line is designed and manufactured in France, under the leadership of Yves Trélohan, Managing Director, Shareholder and Board Member of parent company Immersive Audio Technologies Group.
