

BRYSTON

A Lifetime of Music

MEMO: To all Bryston Customers

SUBJECT: Absolute Sound Magazine HP's Editors Choice Award

DATE: February 22nd, 2011

We are extremely pleased to announce that the **Bryston 28B SST² Mono Amplifier** has been awarded **HP's 2011 Editors Choice Award** in the February 2011 issue of the Absolute Sound Magazine – the BDP-1 Digital Player also got a mention.

28B Mono Amps

Here's what Harry had to say:

Bryston (28BSST-2 Revision)

Mono-blocks

\$17,500., the

emphasis at

Bryston was on

reliability, not

sonic excellence,

thus its

widespread use

among audio

professionals, but

not the denizens of the

high-end world. But now, Bryston is bringing its

technical wizardry to the cutting edge. (It is, as of this writing, introducing a

digital player- a stand-alone that plays back raw digital data from USB thumb-

drives or hard drives that can be downloaded from the Web directly, bypassing

all the computer crap that mucks up ordinary downloads, reading off nothing

more than the digits in their purest form. The BDP1-1 can play back these

downloaded files all the way up to 192kHz/24-bit.)

The 28B mono-block amps were the big breakthrough and have, since their introduction, gone through two updates, each providing greater purity, greater clarity (without the edge of so-called high-resolution designs), and, with the latest, the SST-2 achieving a significant retrieval of high-end “air” and ambient information, and in a much more relaxed fashion, one exhibiting more subtle dynamics, both at the micro and macro ends of the spectrum. I say this is the most musical solid-state design I’ve heard!”
