

# BRYSTON

A Lifetime of Music

## MEMO: To All Bryston Customers SUBJECT: Bryston BOT-1 Quick Look

June 2015

Joseph Ki Cheong  
Ming

Bryston recently released the BOT-1 called the 'Bryston Digital Transport' to partner with their BDP-2 Digital Player.

AV Designs just delivered a unit and it works wonders in my digital front end! I can now play CD that sounds as good as the ripped files. The BOT-1 reads the CD then buffers it utilizing the BDP-2 before sending on to BDA-2 DAC which explains the sound quality.

What's amazing is, with the BOT-1, I do not need to deal with the hustles of ripping music files using my computer/laptop, transfer to my SSD & refresh my BDP to update the new uploaded music files; all these jobs are cleverly been taken care of by this small 1/3 sized stature that is not only

cute looking but it expanded my BDP-2 to a mighty digital ripping machine!

I can now listen to the CD while ripping. And I can also burn my favorite playlists to CDR.

How nice!!
