

A Lifetime of Music

MEMO: To All Bryston Customers
SUBJECT: Bryston A2 Speaker Review

August 2015

Hi Folks,

Sneak peak of a review on the Bryston A2 speaker in the upcoming issue of French Magazine Son & Image:

Conclusion

A tour de force at this price because these Bryston A2's play audio, so well, comparable to speakers at double or almost triple their prices.

Amazing!

The multiple driver setup, besides giving a great look to A2, produce an amazing quality sound. Being able to play at a realistic volume with ease and without distortion the A2 depends in part on this design of the six drivers per speaker and also the quality and rigorous design and manufacturing techniques..

If I were at the point of purchasing new speakers, the Bryston A2 model would be at the top of my list! At the price of \$ 2,790 a pair the quality / price of the model Bryston A2 speaker is somewhat remarkable.

In addition, they are designed and manufactured here in Canada, and all accompanied by the Bryston famous 20-year warranty.

A MUST listen without hesitation!
