

BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston A2 Speaker Review

March 2016

“The temptation is to look at their size and their beautifully understated finish, and expect the Bryston Model A2 to represent a high point in the art of speaker making.

They do have a lot to offer, especially detail, timing and impact. They can sound really exciting. That might make them well suited to rock music, but they also produced an orchestral image and depth

that surprised me. I wouldn't have thought you could do that with three pairs of drivers a side.”

Toby Earp

“If you're looking for lightning-fast speaker response, rock-solid impact and crystal clear lyrics, you'll find them all with this pair. If you also insist on precise imaging and more than decent depth, you'll find it all here too.”

Albert Simon

“When money is scarce, I generally prefer small speakers to large ones. But small speakers have their own problems, and in a large room you may need to turn to full-sized speakers.

The speakers look terrific, and they mostly sound no less terrific.”

Gerard Rejskind
