

# BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston Demo – AXPONA 2018 –SOHT Magazine

April 2018

Bryston was demoing an ‘Active’ Mini T system that involved speakers sans ‘passive’ crossovers.

The system uses an active dividing network, the BAX-1 which fed signals to a multi-channel amp, the 24B Cubed 6-channel amp.

This amp delivers 300 watts to each woofer and 75 watts each to the mids and tweeters.

The crossover has DSP with a 10-channel parametric EQ for tuning the bass.

This topology concept is a brilliant idea and the results are there for all to hear.

What I heard was a very transparent mid-range and extended highs. Bass was solid and had low distortion.

This is a very impressive system that comes with a 20-year warranty. And the thing with Bryston is that they will be around 20 years from now to honor that commitment.

I enjoyed every minute listening to this system.

Jim Clements
