

MEMO: To all Bryston Customers

SUBJECT: Bryston BR-2 Multi- Function Remote Control

May 2009

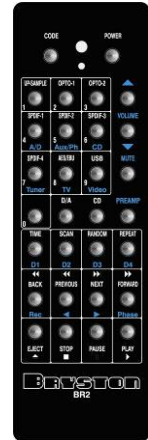

As of May, 2009 Bryston will utilize the recently introduced **Bryston BR2** multi-product hand-held remote control as the optional remote for all Bryston products with remote capability. The prior generation of dedicated remotes for each individual product will no longer be available. Offering only one remote provides Bryston with a more cost effective remote control solution.

Price reduction: The BR2 remote will now be available for \$350 MSRP reduced from the introductory price \$500 MSRP.

Complete information on the BR2 remote can be found here:
http://bryston.com/BrystonSite05/08/BR2_REL.pdf

Products with which the BR2 can be utilized:

- **BCD-1 CD Player – all functions**
- **BDA-1 External DAC – all functions**
- **BP-6 Preamplifier – volume/mute only**
- **BP-16 Preamplifier – all functions**
- **BP-26/25 Preamplifier – volume/mute/phase only**
- **SP-2 Preamplifier – volume/mute only**
- **B-60R Integrated Amplifier – volume/mute only**
- **B-100 Integrated Amplifier – all functions**

The BP26 preamplifier will no longer include the simple (volume/mute only) remote. The BR2 will be the only remote OPTION for this product.

The only product that will come standard with a BR2 remote is the BCD-1 CD PLAYER.

This will also provide the customer with a single remote that can control most Bryston products. Please change your Bryston price lists dated January 2009 to reflect these changes.

Regards,

James Tanner
